Objective

Polished professional with 8 years of tech experience delivering enterprise solutions seeking an opportunity to solve business problems with frontend web technologies such as React and Angular.

Professional Experience

Frontend Developer, *BlazeBite*   Feb 2023 – present
                                                                        Cleveland, OH
- Automate customer signup and collection of vendor information removing need for manual signup process.
- Develop UI to collect vendor information using Angular and Angular Material.
- Interface with Google Firebase to create customer accounts and store vender data.
- Participate in code reviews and contribute to feature design.

Senior Consultant, *Column5 Consulting*   Feb 2011 – Aug 2019
                                                                        Scottsdale, AZ (travel /
                                                                        remote)
- Guided clients through enterprise performance management software implementation throughout the software development lifecycle, including requirements gathering, process evolution, development, training, testing, and maintenance.
- Led design and implementation process, overseeing and supporting other project team members, and collaborating best practices and standard approaches.
- Implemented financial models to help businesses:
  - Analyze the business to answer managerial questions (e.g., is the company adequately staffed to meet current and future objectives).
  - Decrease time to complete monthly and yearly reporting.
  - Improve clarity of financial forecasting and reporting.
- Identified and mitigated project risks in collaboration with project management and stakeholders.
- Developed data transformations, business logic, and reports using proprietary scripts, SQL, table based calculation engines, and visual basic / MS Excel.

Projects

myadventureproperties.com, *A short-term rental booking demo | React | Nextjs | MongoDB* ⧉
- Search for available properties by date and other attributes
- Geo search with autocomplete suggestions and proximity sorting
- Secure login for making and viewing reservations

prop-x, *Responsive properties for React / Next.js components* ⧉
- A library for React components to pass and consume properties with values for each screen width.
- Retrieve property values in styled-components based on breakpoints.
- Optimize Next.js and other SSR and SSG applications by moving client logic to build time static site generation and server side rendering.

Skills

JavaScript *(ES6, React, Next.js, Jest)* • **TypeScript** • **HTML / CSS** • **SQL** • **mongoDB** • **Git** • **npm** • **CI/CD**

Education

Bachelor of Science in Accounting / Minor in Computer Science, *Miami University*   2003 – 2007
                                                                                                        Oxford, OH
